Assistance with Complex
Reporting Standards

Overview

TechCXO's Technical Accounting Advisory Practice (TAAP) is here to help support your company in any form of transaction. Our practice consists of former Big 4 national office partners, FASB and AICPA liaisons including Fortune 500 technical accounting industry experts.

Purpose

We provide assistance in applying complex reporting standards to help you understand and adapt to today's ever changing regulatory environment. Often Companies may lack the necessary expertise to adapt to new rules and regulations. We provide value by providing you with on demand dedicated expertise necessary to tackle and implement necessary changes.

TechCXO's Unique Expertise

The leadership of TechCXO's Technical Accounting Advisory Group has worked directly on FASB/IASB and AICPA working groups, task forces and transition resource groups. You can leverage this experience to understand the issues and subsequent readiness, disclosure and control requirements.

On-Call Support

Our on-call support group is ready to help you navigate through any of technical accounting and reporting issues on a time and materials basis.

Help with Major Financial Reporting Issues

Our team can help you tackle any of the following major financial reporting issues:

Accounting Changes - We assist both public and private clients through accounting changes whether it be the new revenue, lease or financial instrument standard to help you maintain focus on current operation while adapting to new changes at the same time. Our group will help you understand and apply the new standards for timely compliance.

Transaction Advisory: We assist on current technical accounting matters such as IPOs, business combination, financial instruments, derivatives, debt and equity restructuring, income tax provision, financial asset transfers, revenue, leases, consolidation and share based payment schemes, among others. This team also helps you draft internal policies, processes and controls to comply with these topics.

SEC Compliance: This team helps Companies with SEC consulting including Regulations S-X and S-K compliance, business acquisitions, reverse mergers (including shells), offerings, and quality of earnings reports.

Board reporting and Internal Controls: We help companies with board governance and Sarbanes-Oxley compliance whether it be testing or reviewing current operations and recommending new controls.
